## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Employment, Earnings and Hours,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-4090) or to the Statistics Canada reference centre in:

|            |            |           |            |
|------------|------------|-----------|------------|
| St. John's | (772-4073) | Winnipeg  | (983-4020) |
| Halifax    | (426-5331) | Regina    | (780-5405) |
| Montréal   | (283-5725) | Edmonton  | (495-3027) |

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinales et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressés à:

Emploi, gains et durée du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-4090) ou au centre de consultation de Statistique Canada à:

|            |            |           |            |

## Note of Appreciation

*Canada owes the success of its statistical system to  
a long-standing cooperation involving Statistics  
Canada, the citizens of Canada, its businesses and  
governments. Accurate and timely statistical  
information could not be produced without their  
continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose  
sur un partenariat bien établi entre Statistique Canada  
et la population, les entreprises et les administrations  
canadiennes. Sans cette collaboration et cette bonne  
volonté, il serait impossible de produire des statistiques  
précises et actuelles.*

## Notes

Data for the current month are preliminary estimates and are subject to revision in the next issue of this publication.

Data contained in this publication (unless otherwise specified) are not seasonally adjusted.

### Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### Note on CANSIM

The data published in Employment, Earnings and Hours (Catalogue No. 72-002) are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). Users interested in accessing data via CANSIM should contact one of Statistics Canada's regional centres at the numbers listed on the inside front cover of this publication, or contact CANSIM division, Statistics Canada, R.H. Coats Building, Ottawa, Ontario, K1A 0T6 (613) 951-8200

### Design your own table

Design your own table to order Employment, Payrolls and Hours data in the detail you need it. All data collected by the survey can be custom tabulated to meet your particular data needs. A consultant will help you custom design your tabulation. Our office is open from 8:00 A.M. to 4:30 P.M..

Telephone: (613) 951-4090

Facsimile: (613) 951-4087

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984. (M)

## Notes

Les données du mois le plus récent sont des estimations préliminaires et seront révisées lors de la prochaine parution de cette publication.

À moins d'avis contraire, les données paraissant dans cette publication sont non désaisonnalisées.

### Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

### Note concernant CANSIM

Les données qui sont publiées dans l'Emploi, gains et durée du travail (n° 72-002 au catalogue) peuvent être obtenues sous forme lisible par machine de CANSIM (Système Canadien d'information socio-économique). Les utilisateurs voulant obtenir des chiffres par l'intermédiaire de CANSIM peuvent contacter un des centres de consultation de Statistique Canada dont les numéros de téléphone figurent à l'endos du couvert de cette publication ou en communiquant directement avec CANSIM, Statistique Canada, Immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6 (613)951-8200.

### Commandez votre propre tableau

Commandez votre propre tableau des données de l'emploi, de la rémunération et des heures de travail, selon le détail désiré. Toutes les données recueillies par l'enquête peuvent être totalisées selon vos besoins. Un consultant est disponible pour vous aider à créer votre propre tableau. Notre bureau est ouvert entre 8:00 et 16:30 heures.

Téléphone : (613) 951-4090

Bélinographe : (613) 951-4087

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48-1984. (M)

# Survey Overview

# Aperçu de l'enquête

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of payroll employment, paid hours and earnings. These measures are compiled at detailed industrial levels for Canada, the Provinces and Territories.

All employers in Canada, except those primarily concerned with agriculture, fishing and trapping, private household services, religious organizations and defence services, form the target population for the survey.

Conceptually, the SEPH reference period is the last seven days in any specified month, but the questionnaire asks respondents to report for the last pay period in the month.

The statistics contained in this report are based on information provided by firms of all sizes and in the case of government units, by Public Institutions Division in Statistics Canada.

Data are released for the two latest reference months. The preliminary month's estimates and the preceding revised month's estimates are based on response rates of approximately 80% and 90% respectively.

## DEFINITIONS

### *Employee:*

Any person(s) drawing pay for services rendered or for paid absences, and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form.

### *Average Earnings:*

Gross taxable payrolls divided by the number of employees on payrolls equals average earnings. Excluded from the payroll dollar amounts are taxable allowances and benefits, lump sum special payments, certain types of non-wage compensation as well as employer contributions to unemployment insurance, Canada/Quebec pension plans, provincial medical plans, worker's compensation and other welfare plans.

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances mensuelles de l'ensemble des salariés inscrits sur le registre de paye, des heures rémunérées et des gains. Ces mesures sont rassemblées à des niveaux détaillés selon l'activité économique pour le Canada les provinces et les territoires.

L'enquête vise tous les employeurs au Canada à l'exception de ceux dont l'activité principale est liée à l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

En théorie, la période de référence de l'EERH correspond aux sept derniers jours du mois de référence, mais les répondants doivent remplir le questionnaire en tenant compte de la dernière période de paye du mois.

Les statistiques contenues dans ce rapport sont basées sur des renseignements fournis par des entreprises de toutes tailles ainsi que par la Division des institutions publiques de Statistique Canada.

Les statistiques sont publiées sur les deux derniers mois de référence. Les estimations préliminaires du mois le plus récent et les estimations révisées du mois précédent sont basées sur des taux de réponse approximatifs de 80 % à 90 % respectivement.

## DÉFINITIONS

### *Salarié:*

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada.

### *Gains moyens:*

La masse salariale brute imposable divisée par le nombre de salariés inscrits sur la liste de paye est égale aux gains moyens. Sont exclus de la masse salariale, les indemnités imposables, les paiements forfaitaires spéciaux, certains genres de rémunération non salariale ainsi que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes de pension du Canada et du Québec, aux régimes d'assurance-maladie provinciaux, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance.

### **Average Hours:**

Average weekly hours are obtained by dividing the total weekly hours by the number of employees. Total paid hours are defined as all hours worked including overtime hours plus hours of paid absence.

*There are differences between SEPH and other related employment and compensation measures. A summary of these differences and a more detailed description of the SEPH survey is located in the Concepts and Methods Section (Annex 1).*

### **Heures moyennes:**

Les heures hebdomadaires moyennes sont calculées en divisant le nombre total d'heures hebdomadaires par le nombre de salariés. Le nombre total d'heures rémunérées est défini comme étant toutes les heures travaillées y compris les heures supplémentaires et les heures d'absence payées.

*Certaines mesures de l'emploi et de la rémunération, souvent comparées aux données de l'EERH, présentent des différences entre elles. Un résumé de ces différences et une description plus détaillée de l'enquête sur l'EERH figurent dans la section sur les Concepts et les méthodes (annexe 1).*

## Highlights

## Faits saillants

### Preliminary Estimates of October 1992, Seasonally adjusted

- Growth in industrial aggregate<sup>1</sup> average weekly earnings<sup>2</sup> continued to abate in October. Employees averaged weekly earnings of \$554.65 in October, an increase of 2.4% since the beginning of 1992. This compares to earnings growth of 3.3% for the same period in 1991.

### Estimations préliminaires du mois de octobre 1992, Données désaisonnalisées

- Pour l'ensemble des industries<sup>1</sup>, la croissance des gains hebdomadaires moyens<sup>2</sup> a continué de fléchir en octobre. En moyenne, les employés gagnaient \$ 554.65 par semaine en octobre, soit une hausse de 2.4 % depuis le début de 1992, comparativement à 3.3 % au cours de la même période en 1991.

### Industrial Aggregate, Canada / Ensemble des industries, Canada

#### Average Weekly Earnings, Seasonally Adjusted / Rémunération hebdomadaire moyenne, désaisonnalisée. October 1992 / Octobre 1992

- Compared to September, industrial aggregate average weekly earnings increased 0.15%. Finance, insurance and real estate (1.2%) and trade (1.1%) recorded growth rates in excess of the industrial aggregate.

- Canada industrial aggregate payroll employment was 9,894,000 in October. The level of payroll employment was virtually unchanged from September following three months of decline. The only provinces to record increased employment were British Columbia, Quebec and Nova Scotia

- At the Canada level, declining employment in transportation, communication and other utilities was offset by growth in educational services and public administration.

#### Employment, Seasonally adjusted / Emploi, désaisonnalisé. October 1992 / Octobre 1992

- Comparativement au mois de septembre, la rémunération hebdomadaire moyenne pour l'ensemble des industries a progressé de 0.15 %. On a observé des taux de croissance supérieurs à l'ensemble des industries dans les secteurs des finances, assurances et affaires immobilières (1.2 %) et du commerce (1.1 %).

- Pour l'ensemble des industries au Canada, le nombre de salariés inscrits sur la liste de paye s'établissait à 9,894,000 en octobre. Ce nombre est demeuré pratiquement inchangé par rapport à septembre après avoir diminué pendant trois mois. La Colombie-Britannique, le Québec et la Nouvelle-Écosse sont les trois seules provinces où on a enregistré une hausse du nombre de salariés.

- Pour ce qui est de l'ensemble du Canada, la diminution du nombre de salariés dans les secteurs des transports, communications et autres services publics a été compensée par la croissance dans les services d'éducation et d'administration publique.

- Durable goods of manufacturing employment was down (-11,000) mainly due to a temporary layoff in motor vehicle industries in Ontario.

After six consecutive months of no change, seasonally adjusted average weekly hours for hourly employees were reduced slightly to 30.4 hours.

#### Unadjusted Data

- The year-over-year change in employment for the industrial aggregate remained negative (-1.7%); however it was the smallest decline in nearly two years.

- Employment growth is becoming more widespread across industries in the economy; the industrial aggregate employment diffusion index was 0.44 in October.

- For the first time in twenty-two months, more than half of the service producing industries recorded year-over-year employment growth. The October employment diffusion index was 0.51 for service producing industries.

- Dans le secteur des biens durables des manufactures, on constate un recul du nombre de salariés (- 11,000), en raison surtout des congédiements temporaires dans le secteur des véhicules automobiles en Ontario.

Après six mois consécutifs de stabilité, les heures hebdomadaires moyennes désaisonnalisées pour les salariés rémunérés à l'heure ont légèrement diminué pour s'établir à 30.4 heures.

#### Données non désaisonnalisées

- Pour ce qui est de l'ensemble des industries, la variation d'une année à l'autre du nombre de salariés démontrait encore une diminution (-1.7 %). Il s'agit toutefois de la plus faible baisse en presque deux ans.

- Dans l'ensemble des industries, la croissance du nombre de salariés s'étend à plus de secteurs de l'économie, l'indice de diffusion de l'emploi s'établissant à 0.44 en octobre.

- Pour la première fois en vingt-deux mois, on a constaté une progression du nombre de salariés d'une année à l'autre dans plus de la moitié des industries de la branche productrice de services. L'indice de diffusion de l'emploi atteignait 0.51 en octobre, pour la branche productrice de services.

Diffusion Index of Employment, All employees, Canada, October 1992.

Indice de diffusion de l'emploi, ensemble des salariés, Canada, octobre 1992.

<sup>1</sup>The industrial aggregate is the sum of all industries with the exception of agriculture, fishing and trapping, religious organizations, private households and military personnel.

<sup>2</sup>Not adjusted for inflation.

<sup>1</sup>L'ensemble des industries est la somme de toutes les industries à l'exception de l'agriculture, la pêche et le piégeage, les organismes religieux, les ménages privés et les services de défense.

<sup>2</sup>Non ajustée pour l'inflation.

## INTRODUCTION

The Survey of Employment, Payrolls and Hours (SEPH) Program is now releasing selected data on a seasonally adjusted basis.

Seasonally adjusted data are available for 21 industrial groups<sup>1</sup> for Canada and the Industrial Aggregate for each province or territory. The variables that are seasonally adjusted are:

- total number of employees
- average weekly earnings for all employees
- average hourly earnings for hourly paid employees
- average weekly hours for hourly paid employees

Seasonally adjusted series for selected SEPH establishment-based data are published monthly in "Employment, Earnings and Hours" (Catalogue 72-002).

This article briefly describes the elements of a time series, outlines SEPH's revision policy for seasonally adjusted data, and presents highlights of the seasonally adjusted data.

## SEASONAL ADJUSTMENT

Movements in economic time series are caused by changes in the seasonal, trend-cycle and irregular components. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods, and cycles related to crops, production and retail sales associated with Christmas and Easter. Seasonally adjusted series contain irregular as well as longer term cyclical fluctuations. Seasonally adjusted SEPH data provide better and more precise information on the magnitude of non-seasonal changes affecting the employment, earnings and hours data on an industry/geography basis.

## INTRODUCTION

Le programme de l'enquête sur l'emploi, la rémunération et les heures de travail (EERH), vous offre maintenant certaines données en version désaisonnalisée.

Les données désaisonnalisées couvrent 21 secteurs d'activité<sup>1</sup> pour le Canada et l'ensemble des industries pour chaque province et territoire. Les variables désaisonnalisées sont les suivantes:

- nombre total de salariés
- gain hebdomadaire moyen de tous les salariés
- gain horaire moyen des salariés rémunérés à l'heure
- heures hebdomadaires moyennes des salariés rémunérés à l'heure

Les séries désaisonnalisées de certaines données EERH basées sur l'établissement paraissent chaque mois dans la publication (n° 72-002 au catalogue) Emploi, gains et durée du travail.

Cet article décrit brièvement les éléments d'une série chronologiques ainsi que le profil de la politique de révision de l'EERH pour les données désaisonnalisées et présente des faits saillants.

## DÉSAISONNALISATION

Les fluctuations des séries chronologiques économiques sont causées par des mouvements saisonniers, cycliques et irréguliers des composantes. Une série désaisonnalisée est une série dont on a éliminé les effets des mouvements saisonniers. Ces derniers sont causés par des événements annuels réguliers comme les changements de température, congés fériés, les vacances, les cycles agricoles, la production et la vente au détail durant la période de Noël et de Pâques. La série désaisonnalisée contient à la fois des fluctuations irrégulières et des fluctuations cycliques à long terme. Les données EERH désaisonnalisées fournissent des renseignements plus précis sur l'ampleur des variations non saisonnières se répercutant sur les données de l'emploi, des gains et de la durée du travail par la branche d'activité et région.

---

*Howard Krebs est le chef de l'unité d'Analyse et diffusion de l'EERH. On peut le rejoindre aux (613) 951-4063. Serge Lavallée est à la Division du travail rattaché au program EERH.*

The seasonal adjustment program differentiates between seasonal, cyclical and irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data.

Seasonally adjusted data are revised in light of the most recent information on changes in seasonality. Since frequent revisions can create difficulties for users of seasonally adjusted data, the **SEPH** revisions will be done once per year coincident with the release of the revised December reference month data each March.

Most labour market indicators are published in both unadjusted and seasonally adjusted forms because each has its own use. The seasonally adjusted series produced by **SEPH** have been derived using X-11 ARIMA. A technical description of the procedure is available from the Time Series Research and Analysis Division in Statistics Canada<sup>2</sup>.

Seasonal adjustment is imperfect, so if a time series has an irregular movement that is larger than the seasonal variation, the seasonally adjusted series will be a poor estimate of non-seasonal change. In these situations, Time Series Analysis Division recommends using the raw data series.

The industrial aggregate and individual industries are seasonally adjusted separately so the industries do not add up to the industrial aggregate. The **SEPH** program is presently evaluating the additivity notion for seasonally adjusted employment series.

The graphs below compare the raw and seasonally adjusted data for employment and average weekly earnings in educational service industries.

Le programme de désaisonnalisation permet de déceler les mouvements saisonniers, cycliques et irréguliers sur une période de plusieurs années et d'estimer, à la lumière des mouvements passés, les coefficients saisonniers appropriés pour l'année en cours.

Les données désaisonnalisées sont révisées à la lumière des renseignements les plus récents sur les fluctuations saisonnières. Comme des révisions fréquentes peuvent causer des difficultés pour les utilisateurs des données désaisonnalisées, les révisions **EERH** seront faites une fois par an de façon à correspondre à la publication des données révisées du mois de référence de décembre au cours du mois civil de mars.

La plupart des indicateurs du marché du travail sont publiés sous une forme brute et sous une forme désaisonnalisée parce que les deux ont leurs utilisations propres. Les séries désaisonnalisées produites par l'**EERH** ont été traitées à l'aide de la version X-11 ARMMI. On peut se procurer la description technique des méthodes utilisées en s'adressant à la division des séries chronologiques, recherche et analyse, Statistique Canada<sup>2</sup>.

La désaisonnalisation n'est pas parfaite. Si une série a des variations irrégulières plus importantes que les variations saisonnières, la série désaisonnalisée sera une mauvaise estimation des changements non-saisonniers. Dans ce cas, la Division des séries chronologiques recommande d'utiliser la série brute.

L'ensemble des industries ainsi que chaque industrie sont désaisonnalisés individuellement de sorte que la somme de toutes les industries ne totalise pas l'ensemble des industries. Le programme de l'**EERH** évalue présentement l'additivité pour les séries désaisonnalisées de l'emploi.

Les graphiques suivants comparent les données brutes et les données désaisonnalisées de l'emploi et de la rémunération hebdomadaire moyenne des services d'enseignement.

The seasonally adjusted series for educational services show that most of the monthly movements are driven by seasonality. Once the seasonality is removed, the trends are more easily identified. A "SEPH Analysis Guide", describing the seasonal patterns for specific industries is available upon request from the Labour Division.

Les séries désaisonnalisées montrent ainsi que la plus grande partie des mouvements mensuels est représentée par la saisonnalité. Une fois la saisonnalité éliminée, les tendances sont déterminées plus facilement. On peut obtenir sur demande auprès de la Division du travail, un "Guide de l'analyse de l'EERH", celui-ci décrit les mouvements saisonniers pour certaines industries.

## HIGHLIGHTS OF THE SEASONAL PATTERN OF SELECTED INDUSTRIES

Industrial aggregate employment shows a seasonal peak in the spring and summer and a seasonal drop during the winter months. These seasonal fluctuations originate mainly from the goods-producing industries. Logging and forestry, mining, quarrying and oil wells, manufacturing and construction show similar seasonal patterns. The employment in these industries peaks in the summer and falls during the winter months.

## FAITS SAILLANTS DU MOUVEMENT SAISONNIER POUR CERTAINES INDUSTRIES

L'emploi de l'ensemble des industries passe par un sommet saisonnier au printemps et à l'été et enregistre une diminution saisonnière au cours des mois d'hiver. Ces fluctuations saisonnières proviennent principalement de la branche productrice de biens. L'exploitation forestière, les mines, carrières et puits de pétrole, l'industrie manufacturière et la construction ont une composante saisonnière semblable. L'emploi atteint un sommet en été et diminue au cours des mois d'hiver.

For the industrial aggregate, average weekly earnings show virtually no seasonal fluctuations. This phenomenon arises because average weekly hours and average hourly earnings show opposite patterns. Hours peak in the summer, whereas hourly earnings hit their minimum.

Au niveau de l'ensemble des industries, la rémunération hebdomadaire moyenne ne fait ressortir presque aucune fluctuation saisonnière. Ce phénomène s'explique par le fait que les heures hebdomadaires moyennes de travail et la rémunération horaire moyenne se caractérise par des mouvements opposés.

The seasonal changes in average hourly earnings and average weekly hours offset each other, leaving the average weekly earnings almost unchanged.

Les heures passent par un sommet en été, alors que la rémunération horaire tombe à son minimum. Ces deux variations saisonnières s'annulent, ce qui laisse la rémunération hebdomadaire moyenne presque inchangée.

### Industrial Aggregate, Canada / Ensemble des industries, Canada Average Hourly Earnings and Weekly Hours / Rémunération horaire et heures hebdomadaires moyennes

These series represent the differences between the seasonally adjusted and unadjusted data for:

- : Average Hourly Earnings
- : Average Weekly Hours

Ce tableau représente la différence entre les estimations désaisonnalisées et non-désaisonnalisées pour:

- : Rémunération horaire moyenne
- : Heures hebdomadaires moyennes

Employment in non-durable goods manufacturing is subject to more seasonality than in the durable goods industries. A portion of employment in non-durable goods manufacturing is in industries that are tied to climatic conditions. These industries include food, beverage and tobacco.

L'emploi dans le secteur manufacturier de biens non-durables contient plus de saisonnalité que celui du secteur des biens durables. Une partie de l'emploi des biens non-durables du secteur manufacturier provient d'industries affectées par des changements de température. Ces industries sont dans les secteurs de l'alimentation, des boissons et du tabac.

For employment in the service-producing industries, the effect of seasonality varies across industries. While employment in transportation, communication and other utilities and trade reaches its minimum during the winter months, educational services reach

Pour l'emploi, la saisonnalité ne se fait pas sentir de la même façon dans chaque industrie de la branche productrice des services. L'emploi dans les transports, communications et autres services publics et le commerce tombe à son minimum au cours des mois d'hiver, tandis que les services

its minimum in the summer. Commercial services<sup>3</sup>, which include accommodation, food and beverage services, depict a less obvious pattern and demonstrate irregular patterns after seasonal adjustment. The finance, insurance and real estate industries show little seasonal movement. The seasonally adjusted series show that the irregular component is high in these industries.

d'enseignement sont à leur minimum au cours de l'été. Dans les services commerciaux<sup>3</sup> qui comprennent l'industrie de l'hébergement et de la restauration, l'emploi se caractérise par une évolution moins évidente et fait ressortir des mouvements irréguliers après désaisonnalisation. Les finances, assurances et affaires immobilières montrent peu de mouvement saisonnier. Les séries désaisonnalisées montrent que l'irrégularité des composantes est très élevée pour ces industries.

##### Employment / Emploi

Thousands / Milliers

Years / Années

— : Seasonally Adjusted / Désaisonnalisées

In accommodation, food and beverage services, the average weekly hours series is the only variable depicting a clear seasonal pattern, attaining its peak during the summer months. The seasonal pattern in public administration clearly demonstrates the hiring of extra help for the summer months. In 1986 and 1991, the irregular peak in seasonally adjusted employment represents extra hiring for the Statistics Canada Census. During the summer, average weekly earnings reach their minimum level.

En ce qui concerne l'hébergement et la restauration, les heures hebdomadaires moyennes de travail est la seule composante faisant ressortir un mouvement saisonnier clair, qui passe par un sommet au cours des mois d'été. Le mouvement saisonnier de l'administration publique fait clairement ressortir l'embauche d'employés supplémentaires au cours des mois d'été. En 1986 et 1991, l'emploi désaisonné a atteint un sommet inhabituel dû à l'embauche supplémentaire pour le recensement de Statistique Canada. Pendant cette même période, la rémunération hebdomadaire moyenne tombe à son minimum de l'année.

Les concepts et méthodes sont décrits à la fin de la présente publication.  
Les données pour le mois courant sont préliminaires

## Table 2

## Tableau 2

**Estimates of Average Weekly Earnings, for All Employees, Seasonally Adjusted and Unadjusted, Firms of All Sizes, for Selected Industries, Canada, Provinces and Territories, (1988-1992).**

**Estimations désaisonnalisées et non désaisonnalisées de la rémunération hebdomadaire moyenne, pour l'ensemble des salariés, entreprises de toutes les tailles, pour une sélection d'industries, Canada, provinces et territoires, (1988-1992).**

In October, the seasonally adjusted Canada estimate of average weekly earnings was up \$17.70 to \$554.65, a 3.3% increase since October 1991. Average weekly earnings in the goods producing industries increased 3.0%, while the service producing industries rose 3.7% during the same period.

En octobre, la rémunération hebdomadaire moyenne désaisonnalisée au Canada était \$554.65, une hausse de \$17.70, ce qui représente une augmentation de 3.3% depuis octobre 1991. La rémunération hebdomadaire moyenne de la branche productrice de biens a augmenté de 3.0% et la branche productrice de services de 3.7% durant la même période.

**Estimates of Employment, Firms of All Sizes, by Industry, Canada, Provinces and Territories.**

**Estimations de l'emploi, entreprises de toutes les tailles, par industrie, Canada, provinces et territoires.**

In October 1992, the preliminary estimate for all employees in the goods-producing industries was 2,378,942. This was a decrease of 4.1% over October 1991. Mining, quarrying and oil wells had the largest decrease.

En octobre 1992, les estimations préliminaires de l'emploi pour la branche productrice de biens étaient de 2,378,942, soit une diminution de 4.1% par rapport à octobre 1991. La plus forte baisse a été enregistrée dans l'industrie des mines, carrières et puits de pétrole.

---

**Estimates of Employment and Earnings, by Firm Size, for Selected Industries, Canada and Provinces.**

**Estimations de l'emploi et de la rémunération, selon la taille de l'entreprise, pour une sélection d'industries, Canada et les provinces.**

---

Employment in manufacturing for firms with 200 or more employees, has decreased by 5.8% since October 1991. Manufacturing firms with less than 200 employees show a decline of 1.1% over the same period.

L'emploi dans les manufactures pour les entreprises de plus de 200 employés a chuté de 5.8% depuis octobre 1991. Pour la même industrie, les entreprises de moins de 200 employés rapportent une baisse de 1.1% pour la même période.

## Concepts and Methods

# Annexe 1

## Concepts et méthodes

### Objectives

The Survey of Employment, Payrolls and Hours (SEPH) is primarily designed to provide monthly estimates of the total number of employees on payrolls, average weekly and hourly earnings and average weekly hours for Canada, provinces and territories at detailed industry levels.

### Target Population

The target population is all employers in Canada except those primarily concerned with agriculture, fishing and trapping, private household services, religious organizations and defence services. SEPH draws its sample from the Business Register maintained by the Business Register Division of Statistics Canada.

### Data Sources

The statistics contained in this report are based on information obtained from employers of firms of all sizes and from the Public Institutions Division in Statistics Canada. All information except that related to employment and payroll statistics for the government units (federal, provincial and local levels of government) are provided by firms.

### Data Collection

SEPH has four methods of data collection. Questionnaires are mailed out each month to the payroll office of employers. Telephone interviews are used for respondents who express a preference for being surveyed by telephone. Computer printouts are supplied by those respondents who prefer to report their data through their computerized payroll system. SEPH, via an exchange of data arrangement between the Labour and Public Institutions Divisions of Statistics Canada, is supplied with government units records providing general government services which are under the collection responsibility of the Public Institutions Division.

### Reference Period

The SEPH reference period is the last seven days in any specified month, but the questionnaire asks respondents to report for the last pay period in the month. When the reported pay period is longer than

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail (EERH) sert principalement à fournir des estimations mensuelles du nombre total de salariés inscrits sur les listes de paye, des gains hebdomadaires et horaires moyens, et des heures hebdomadaires moyennes pour le Canada, les provinces et les territoires à des niveaux détaillés selon l'activité économique.

### Population cible

La population cible comprend tous les employeurs du Canada, sauf ceux dont les activités relèvent principalement des secteurs de l'agriculture, de la pêche et du piégeage, des services domestiques, des organismes religieux et des services de la défense. L'échantillon de l'EERH est établi à partir du registre des entreprises qui est tenu à jour par la Division du registre des entreprises de Statistique Canada.

### Sources des données

Les statistiques contenues dans le présent bulletin sont fondées sur des renseignements recueillis auprès des employeurs d'entreprises de toutes tailles et de la Division des institutions publiques de Statistique Canada. Tous les renseignements sauf ceux qui ont trait à l'emploi et à la rémunération dans les unités des administrations publiques (aux niveaux fédéral, provincial et local) sont fournis par les entreprises.

### Collecte des données

Quatre méthodes sont utilisées pour la collecte des données de l'EERH. Chaque mois, des questionnaires sont envoyés par la poste au service de paye des entreprises. Les répondants qui le désirent peuvent être interviewés par téléphone. D'autres choisissent de transmettre leurs données au moyen de leur système automatisé d'administration de la paye. Dans le cadre d'une entente d'échange de données conclue entre la Division du travail et la Division des institutions publiques de Statistique Canada, les données de l'EERH relatives au fichier d'unités d'administration publiques qui assurent des services gouvernementaux généraux sont fournies par la Division des institutions publiques qui est chargée d'en faire la collecte.

### Période de référence

La période de référence de l'EERH correspond aux sept derniers jours d'un mois donné, mais les renseignements que les répondants doivent indiquer sur le questionnaire portent sur la dernière période de paye du mois. Lorsque la période de

one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. Reference week adjustments are also made for strikes/lockouts and layoffs.

### Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by questionnaires mailed monthly to a sample of about 56,000 establishments selected out of a universe of about 800,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

### Terms and Definitions

**Establishment:** For statistical purposes it is the smallest entity capable of reporting statistics of economic production, typically a factory, mine, store or similar unit.

**Firm:** A firm is any business or institution whether incorporated or not; it comprises sole proprietorships, partnerships, companies and other forms of organizations.

**Industry classifications:** On the basis of its principal activity, each establishment is assigned an industry code according to the 1980 Standard Industrial Classification. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. SEPH has 281 industry groups in scope. For analytical purposes, we have created special groupings which are not part of the Standard Industrial Classification.

- a) Industrial aggregate (041- 999) represents the sum of all the industries included in the survey.
- b) Goods-producing industries (041-449)(491-499) comprise forestry, mining, manufacturing, construction and other utilities.
- c) Service-producing industries (451-484)(501-999) consists of transportation, communication and storage, trade, finance and insurance, services (except religious organizations and private households) and public administration (except for military personnel, and other government services)

paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye visée. Des rajustements sont faits aussi pour tenir compte des grèves, lock-out et mises à pied survenant durant la semaine de référence.

### Méthodologie

Les statistiques contenues dans la présente publication sont fondées sur les résultats d'une enquête effectuée par sondage menée auprès d'unités déclarantes. Les données sont recueillies par questionnaires envoyés par la poste tous les mois à un échantillon d'environ 56,000 établissements prélevés d'un univers d'environ 800,000 unités. L'échantillon représente toutes les activités économiques que vise l'enquête, toutes les provinces et tous les territoires, ainsi que toutes les tailles d'unités. Chaque mois, l'univers et l'échantillon font l'objet d'une mise à jour pour tenir compte des créations et des disparitions.

### Termes et définitions

**Établissement:** À des fins statistiques, l'établissement est la plus petite unité pouvant fournir des données sur la production économique. En général, une usine, une mine, un magasin ou à une unité semblable.

**Entreprise:** Toute entreprise commerciale ou institution, constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une association, d'une société ou d'une autre forme d'organisation.

**Classement par activité économique:** Un code d'activité économique tiré de la Classification type des industries de 1980 est attribué à chaque établissement selon sa principale activité. Les industries et les différents groupes industriels sont décrits dans le manuel "Classification Types des Industries 1980" catalogue 12-501. Dans les tableaux de cette publication une colonne est indentée "CTI 1980" ces codes correspondent à ce manuel. On compte 281 groupes d'activités visées par l'EERH. À des fins analytiques, nous avons créé des groupes spéciaux qui ne figurent pas dans la Classification type des industries.

- a) Ensemble des industries (041-999) - Représente la somme de toutes les diverses activités économiques visées par l'enquête
- b) Branches productrices de biens (041-449)(491-499) - Comprend les forêts, les mines, les manufactures, la construction et autres services publics
- c) Branches productrices de services (451-484)(501-999) - Englobe les transports, les communications et l'entreposage, le commerce, les finances et les assurances, les services (sauf les organismes religieux et les ménages privés) et l'administration publique (excepté le personnel militaire et autres services gouvernementaux)

- d) Durable goods manufacturing includes wood industries (251-259), furniture and fixtures (261-269), primary metal industries (291-299), fabricated metal products (301-309), machinery industries (311-319), transportation equipment (321-329), electrical and electronic products (331-339) and non-metallic mineral products (351-359)
- e) Non-durable manufacturing is the sum of food industries (101-109), beverage industries (111-114), tobacco industries (121-122), rubber products (151-159), plastic products (161-169), leather products (171), primary textile industries (181-183), textile product industries (191-199), clothing industries (243-249), paper and allied products industries (271-279), printing, publishing and allied industries (281-284), refined petroleum and coal products (361-369), chemical and chemical products (371-379) and other manufacturing industries (391-399)
- f) Commercial services is the sum of business service industries (771-779), accommodation service industries (911-914), food and beverage service industries (921-922), amusement and recreational service industries (961-969), personal service industries (971-979), membership organization industries (982-986) and other service industries (991-999)
- g) Non-commercial services is the sum of educational and related service industries (851-859) and health and social service industries (861-869)
- h) Banks (700) comprises the Central Bank (701) and Chartered Banks and other banking-type intermediaries (702)
- i) Other amusement and recreational services (960) consists of commercial spectator sports (964), gambling operations (966) and other amusement and recreational services (969)
- j) Public Administration (812-837) contains only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level
- d) Fabrication de biens durables - Comprend les industries : du bois (251-259), de meuble et des articles d'ameublement (261-269), de première transformation des métaux (291-299), de fabrication des produits métalliques (301-309), de machinerie (311-319), du matériel de transport (321-329), des produits électriques et électroniques (331-339) et les industries des produits minéraux non métalliques (351-359)
- e) Fabrication de biens non durables - Englobe les industries: des aliments (101-109), de la boisson (111-114), les industries du tabac (121-122), des produits en caoutchouc (151-159), des produits en matière plastique (161-169), du cuir (171), de la première transformation du textile (181-183), des industries des produits textiles (191-199), de l'habillement (243-249), du papier et produits connexes (271-279), de l'imprimerie, édition et industries connexes (281-284), des produits raffinés du pétrole et du charbon (361-369), des produits chimiques (371-379) et les autres industries manufacturières (391-399)
- f) Services commerciaux - englobe les industries: des services aux entreprises (771-779), industries de l'hébergement (911-914), industries de la restauration (921-922), industries de services de divertissements et loisirs (961-969), industries des services personnels (971-979), associations commerciales (982-986) et autres industries de services (991-999)
- g) Services non-commerciaux comprend les industries: des services d'enseignement et services annexes (851-859) et les industries des services de soins et services sociaux (861-869)
- h) Banques (700) - Comprend la banque centrale (701) et les banques à charte et autres intermédiaires de type bancaire (702)
- i) Services de divertissements et de loisirs (960) - Il s'agit des sports commerciaux (964), des loteries et jeux de hasard (966) et d'autres services de divertissement et de loisir (969)
- j) Administration publique (812-837) - Comprend seulement les établissements dont les activités ont un caractère essentiellement gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics

**Geographic classification:** Reporting units are assigned to a province or territory. The statistics contained in this report are based on the 1986 version of the Standard Geographic Classification.

**Classement géographique :** On attribue les unités déclarantes à une province ou à un territoire. Les statistiques contenues dans le présent document sont fondées sur la Classification géographique type de 1986.

**Paid absence:** Paid absence includes paid holidays, sick leave including industrial injury and personal leave such as bereavement leave, jury duty etc.

**Standard work week:** The hours in the standard work week constitute the average number of hours of work normally scheduled in a work week.

**Take all units:** Take all units are reporting units of firms or organizations which are included in the survey sample with certainty every month. Included are all firms or organizations with 200 or more employees, units of government departments, crown corporations, combined companies and combined establishments.

**Take some units:** All other firms in the universe which have a known probability of selection are take some units.

### **Employee**

All persons drawing pay for services rendered or for paid absences and for whom the employer must complete a Revenue Canada T-4 Supplementary Form constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self employed, unpaid family workers, persons working outside Canada, military personnel, and casual workers for whom a T-4 is not required. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

- a) **Employees paid by the hour:** any employee whose basic wage is expressed as an hourly rate.

**Congés payés :** Les congés payés comprennent les jours fériés payés, des vacances, des congés de maladie ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire ext.

**Semaine normale de travail :** Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement déterminées pour une semaine.

**Unités à tirage complet :** Les unités à tirage complet sont des unités déclarantes d'entreprises ou d'organisations qui font partie tous les mois de l'échantillon de l'enquête. Elles comprennent toutes les entreprises ou organisations de 200 salariés ou plus, les unités des services gouvernementaux, les sociétés de la couronne, les sociétés combinées et les établissements combinés.

**Unités à tirage partiel :** Toutes les autres entreprises qui ont une probabilité connue d'être choisies dans l'échantillon de l'enquête sont des unités à tirage partiel.

### **Salarié**

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada est un salarié.

Le terme "salarié" désigne les salariés à plein temps et à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, administrateurs, associés et autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les personnes travaillant à l'extérieur du Canada et le personnel militaire et pour les employés occasionnels dont l'employeur n'est pas tenu de remplir la formule T4. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (c.-à-d. les personnes en grève, en congé non payé, les personnes recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'un régime analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie sont quand même considérés comme des salariés.

Les salariés sont classés dans les catégories suivantes :

- a) **Salariés rémunérés à l'heure:** tout salarié dont la rémunération de base est calculée selon un taux horaire.

- b) **Salaried employees:** any employee whose basic remuneration is a fixed amount for at least one week.
- c) **Other employees:** those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.
- d) **Non-teaching Staff:** all employees other than teachers and academic staff i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)
- e) **Teaching Staff:** those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.
- f) **Supply or Substitute Teachers:** teachers who are called in to teach whenever their services are needed either to augment the existing staff or as a short-term replacement for a full-time or part-time teacher.

#### Earnings

**Payrolls:** excludes dollar amounts that are taxable allowances and benefits, certain types of non-wage compensation as well as employer contributions to unemployment insurance, Canada/Quebec pension plans, provincial medical plans, workers compensation and other welfare plans. Annual special payments are excluded while other lump sum special payments are adjusted to coincide with the reference week period.

**Overtime pay:** includes all pay received for the number of hours worked in excess of the standard work-day or work-week.

**Average weekly earnings (including overtime):** represent gross taxable payrolls divided by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees and for the other types of employees.

**Average weekly overtime earnings:** is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

b) **Employés:** tout salarié dont la rémunération de base constitue une somme fixe versée pour au moins une semaine.

c) **Autres salariés:** tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de millage, etc.

d) **Personnel non enseignant:** tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économiste, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.

e) **Personnel enseignant:** tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

f) **Suppléants ou remplaçants:** enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

#### Gains

**Rémunération:** ne comprend pas les montants en dollars qui représentent des allocations et des avantages imposables, certains types d'indemnités non salariales ainsi que les cotisations patronales à l'assurance-chômage, au régime de pension du Canada ou au Régime des rentes du Québec, aux régimes d'assurance-maladie provinciaux, aux caisses d'indemnisation des accidents du travail et à d'autres régimes de prévoyance. Les paiements annuels spéciaux sont exclus tandis que les paiements forfaitaires spéciaux sont rajustés de façon à coïncider avec la semaine de référence.

**Rémunération du temps supplémentaire:** ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

**Gains hebdomadaires moyens (incluant le temps supplémentaire):** rémunérations brutes imposables divisées par le nombre de salariés. Les heures hebdomadaires moyennes (y compris les heures supplémentaires) sont déterminées en divisant le total des heures hebdomadaires par le nombre de salariés. Ces données sont calculées à l'égard des salariés rémunérés à l'heure et des employés.

**Gains hebdomadaires moyens du temps supplémentaire:** ces gains sont obtenus en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre de salariés. Ils sont calculés à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

**Average hourly overtime earnings:** is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

**Average hourly earnings (including overtime):** is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). Average hourly earnings is calculated for the hourly-rated employees and for the salaried employees.

**Average hourly overtime earnings:** is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

**Average weekly earnings (excluding overtime):** is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

#### **Hours**

**Average weekly overtime hours:** is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

- a) **Total hours paid:** all hours worked, including overtime hours, plus hours of paid absence (e.g. holidays, sick leave, jury duty, etc.)
- b) **Overtime hours:** the total hours for which overtime was paid. These represent the hours worked.

#### **Sample Design**

##### **Survey Frame**

SEPH integrated to the new Business Register beginning with the October 1990 data reference month. The new Business Register is a complete list of all Canadian business entities engaged in economic activity. The objectives of the new BR are to improve coverage of the business universe, achieve greater consistency and comparability among the business surveys and to reduce respondent burden for smaller firms.

**Gains horaires moyens du temps supplémentaire:** gains calculés pour les employés rémunérés à l'heure en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

**Gains horaires moyens (incluant le temps supplémentaire):** ces gains sont obtenus en divisant les rémunérations hebdomadaires totales par le total hebdomadaire des heures travaillées (le total des heures hebdomadaires est celui qui est déclaré pour les salariés rémunérés à l'heure; pour les employés, les gains sont établis en multipliant la moyenne des heures travaillées pendant la semaine normale de travail par le nombre d'employés). Les gains horaires moyens sont calculés à l'égard des salariés rémunérés à l'heure et des employés.

**Gains horaires moyens du temps supplémentaire:** gains calculés pour les employés rémunérés à l'heure en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

**Gains hebdomadaires moyens (excluant le temps supplémentaire):** ces gains sont déterminés en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires du temps supplémentaire, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure et des employés.

#### **Heures**

**Heures supplémentaires hebdomadaires moyennes:** ces heures sont obtenues en divisant le total hebdomadaire des heures supplémentaires par le nombre de salariés. Cette moyenne est calculée pour les employés rémunérés à l'heure.

- a) **Nombre total d'heures rémunérées :** ensemble des heures travaillées, y compris les heures supplémentaires, plus les heures de congé payé (par ex., les jours fériés, les congés de maladie, les congés pour fonctions judiciaires, etc.).
- b) **Heures supplémentaires :** total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

#### **Modèle de l'échantillon**

##### **Base de sondage**

On a commencé à utiliser le nouveau registre des entreprises pour réaliser l'EERH à compter du mois de référence d'octobre 1990. Le nouveau registre des entreprises est une liste complète de toutes les entités commerciales canadiennes engagées dans une activité économique. Le RE a pour objet d'améliorer la couverture de l'univers des entreprises ainsi que la cohérence et la comparabilité des données des enquêtes-entreprises, et de réduire le fardeau de réponse des entreprises de plus petite taille.

The BR consists of the integrated portion (IP) of larger units which are updated regularly through survey feedback, profiling and administrative sources. The non-integrated portion (NIP) comprises smaller payroll deduction records and are updated essentially from administrative sources.

### **Stratification**

For the purpose of the sample selection and for the determination of the survey sample size, the universe of reporting units is stratified into 12 provinces and territories, 16 industry divisions and 4 sizes. (An industry division is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees. The universe of reporting units is further stratified into take-all and take-some categories. The total sample size of SEPH is governed by the objective of a 3.00% coefficient of variation for the estimate of employment at the province by industry division level.

### **Sample Allocation and Selection**

The size of the take-some for the survey has been determined in order to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. Sampling fractions are computed for all cross-classifications of 3 digit SICs, province and size groups. To minimize the sample size, the sample allocation is such that the largest units are the most likely to be selected. However, the sampling fractions cannot be smaller than 0.01. A systematic sample is drawn for every 3 digit industry, province and size group. If the population count is less than 4 at the 3 digit SIC by province by size level, then the sampling fraction is disregarded and all the units are selected. The total sample size is the sum of the number of take-all and selected take-some units.

### **Sample Rotation**

Generally speaking, after 12 months, in-sample units are replaced, and are not eligible for reselection for at least 12 months. Hence, approximately 1/12 of the take-some sample is replaced every month. Some units have to stay more than 12 months in sample due to the lack of replacement units at the 3 digit industry, province and size group level.

Le RE comprend la partie intégrée des données sont les unités plus importantes qui sont mises à jour de façon régulière à l'aide des résultats obtenus au moyen d'enquêtes, d'établissement de profils et de sources administratives. La partie non-intégrée comprend les plus petites retenues sur les gains brute qui sont mis à jour principalement à partir de sources administratives.

### **Stratification**

Pour les besoins de l'enquête on détermine la composition de l'échantillon et la taille en stratifiant l'univers des unités déclarantes est stratifié en 12 provinces et territoires, 16 branches d'activité et 4 catégories de taille. (Une branche d'activité est légèrement plus détaillée qu'une activité qui correspond à un code à un chiffre.) La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre catégories de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus. En outre, l'univers des unités déclarantes est stratifié en deux groupes : les unités à tirage complet et les unités à tirage partiel. La taille de l'échantillon global de l'EERH est déterminée en tenant compte du fait que l'on vise un coefficient de variation de 3.00% pour l'estimation de l'emploi au niveau de la province et de la division en fonction des activités.

### **Répartition et choix de l'échantillon**

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau de la branche d'activité et de la province. Des fractions de sondage sont calculées pour tous les classements recoupés au niveau des codes à trois chiffres de la CTI, de la province et par groupe de tailles. Pour minimiser la taille de l'échantillon, l'échantillon est réparti de façon que les unités les plus importantes sont les plus susceptibles d'être choisies. Les fractions de sondage ne peuvent toutefois pas être inférieures à 0.01. Un échantillon systématique est tiré pour chaque combinaison de la CTI niveau des codes à trois chiffres, de la province et de la taille. S'il y a moins de 4 unités au niveau des codes de la CTI à 3 chiffres selon la province et par groupe de tailles, on ne tient pas compte de la fraction de sondage et toutes les unités sont choisies. La taille de l'échantillon est la somme du nombre d'unités à tirage complet et de certaines unités à tirage partiel.

### **Rotation de l'échantillon**

De façon générale, après 12 mois, les unités échantillonnées sont remplacées, et ne peuvent pas être choisies de nouveau avant au moins 12 mois. Par conséquent, le un douzième environ des unités à tirage partiel de l'échantillon est remplacé chaque mois. Il peut arriver que des unités doivent demeurer plus de 12 mois dans l'échantillon à cause du manque d'unités de remplacement au groupe codes d'activités à trois chiffres à la province, à la taille.

## Reliability

Reliability of the estimates can be assessed by examining sampling errors and by controlling non-sampling errors. These are two types of errors possible in estimates based on a sample survey.

*Sampling errors* occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. The difference with respect to a particular estimate is called the sampling error of the estimate.

*Non-sampling errors* are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the question, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. Efforts to reduce non-sampling errors include careful design of questionnaires, editing of data follow-up of and imputation for non-respondents and thorough control of processing operation. The SEPH program has a head-office Quality Assurance unit that is mandated to reduce non-sampling errors and ensure that concepts and definitions are respected.

### Indicators of Sampling Errors

The true sampling error is not known, however, it can be estimated from the sample itself by using a statistical measure called the standard error of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation. Tables of indicators of the coefficients of variation are available on request along with an explanatory note on how to use them to judge the quality of the estimates contained in this publication.

### Non-Sampling Errors

SEPH has a statistical quality control program at the data capture, structure updating and data editing stages to minimize non-sampling errors. These programs monitor and control the completeness, accuracy and consistency of the reported survey data. Procedures are in place to follow-up for non-response and to impute for those late responses since SEPH publishes estimates only for the two recent months in any particular reference cycle.

## Fiabilité des estimations

La fiabilité des estimations est fondée en examinant l'erreur d'échantillonnage et en contrôlant les erreurs non due à l'échantillonnage. Ce sont les deux types d'erreurs possibles dans l'échantillon.

*Les erreurs d'échantillonnage* proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes intervieweurs et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle l'erreur d'échantillonnage de l'estimation.

*Les erreurs non dues à l'échantillonnage* ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. On cherche à réduire le nombre d'erreurs non dues à l'échantillonnage par une formulation soignée des questionnaires, une vérification attentive des chiffres déclarés, le travail de suivi, l'imputation de données aux unités non répondantes et un contrôle rigoureux des techniques de traitement. Il existe une sous-section de contrôle de la qualité au bureau central qui est chargée de réduire le nombre d'erreurs non dues à l'échantillonnage pour l'EERH et de veiller à ce que les concepts et les définitions soient observés.

### Indicateurs des erreurs d'échantillonnage

L'erreur d'échantillonnage reste inconnue, on peut cependant l'estimer à partir de l'échantillon en utilisant une mesure appelée écart-type d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation. Des tableaux d'indicateurs de coefficients de variation sont disponibles sur demande ainsi qu'une note explicative sur la façon de les utiliser pour déterminer la qualité des estimations figurant dans la présente publication.

### Erreurs non due à l'échantillonnage

L'EERH comprend un programme de contrôle de la qualité des données qui est appliqué lors de la saisie des données, de la mise à jour des structures et du contrôle des données afin de minimiser les erreurs d'échantillonnage. Ce programme sert à déterminer et à vérifier l'intégrité, la précision et la cohérence des données déclarées. Des mesures sont prévues pour le suivi des cas de non-réponse et pour l'imputation de données dans le cas de déclarations tardives étant donné que les estimations tirées de l'EERH sont publiées seulement pour les deux mois les plus récents de toute période de référence.

## **Response Rates**

Each month, SEPH releases statistics for the two latest reference months. The "preliminary" month's estimates and the "revised" month's estimates are based on response rates of 80% and 90% respectively for both reporting units and employment.

## **Characteristics of Non-Respondents and Follow-up**

Firms that do not report data diminish the accuracy of the estimates. Non-response may affect the estimates in different ways. Non-response may be divided into those who refuse to report and those who report "late".

Less than one percent of firms surveyed refuse to report data and most refusals are by small firms. About ten per cent of firms report too late to be included in the estimation process at all. Late reporters tend to be large firms and those using the computer reporting service (CRS) for data collection.

Reporting units, which are non-respondents to the initial mailing, are followed up by telephone by the staff of the regional offices of Statistics Canada. If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

## **Imputation**

Imputation for non-respondent units, which have been in the survey for more than one month, is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each non-respondent.

For the non-responding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit and the characteristics of the responding units in the same industry group, province and size. Previous months data are used to impute for establishments with more than 200 employees.

## **Taux de réponse**

Chaque mois, des statistiques de l'EERH sont publiées pour les deux derniers mois de référence. Les estimations "préliminaires" du mois le plus récent et les estimations "révisées" du mois qui le précède sont fondées sur des taux de réponse de 80 % et de 90% respectivement à la fois pour les unités déclarantes et l'emploi.

## **Caractéristiques des non-répondants et suivi**

Les entreprises qui ne déclarent pas de données diminuent la précision des estimations. La non-réponse peuvent influencer sur la valeur des estimations de différentes façons. Les non-répondants peuvent être répartis en deux catégories, soit ceux qui refusent de collaborer et ceux qui remettent leur déclaration en retard.

La proportion des entreprises visées par l'enquête qui ont refusé de fournir des données est inférieure à un pour cent; la plupart des refus sont opposés par les petites entreprises. Environ dix pour cent des entreprises renvoient leur questionnaire trop tard pour que les données puissent être incluses dans le processus d'estimation. Les déclarants tardifs sont habituellement des grandes entreprises et des entreprises qui utilisent le service de déclaration automatisé (SDA) pour la collecte des données.

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Lorsque des unités persistent à ne pas répondre même après le suivi, des données leur sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

## **Imputation**

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui sont visées par l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe d'activité économique, de la même province et de la même taille. Les estimations des mois précédents servent à l'imputation des établissements ayant plus de 200 salariés.

## **Coverage Errors**

Two sources of coverage errors associated with using survey frames relate to duplication and undercoverage. Duplication occurs on the frame when payroll deduction records are unable to be linked to their associated businesses residing on the frame. Undercoverage arises due to the time required to classify and/or link new payroll deduction units.

The Methods and Quality Assurance Section of the Business Register Division produces quality measures to monitor the performance of the frame.

## **Data Edit and Correction**

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics ( e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signalled by the computer edit for review and is subject to correction or acceptance where appropriate.

## **Comparability With Other Data Sources**

### **Employment**

SEPH payroll employment estimates are frequently compared to the employment estimates provided by the Labour Force Survey (LFS). When comparing the establishment-based SEPH employment estimates to the household-based LFS data, some differences can be quantified and others not. The quantifiable adjustments to the LFS include the addition of multiple job holders and the subtraction of the following: unpaid family workers, self-employed, unpaid absentees (such as workers on strike), incorporated businesses, working partners without employees and the industries excluded from SEPH. The adjustments which are not easily quantifiable include differences, errors in SIC coding, differences in reference periods, survey procedures and the unrecorded economy. Also, SEPH covers the Northwest Territories while the LFS does not. The LFS data, which focus on demographic characteristics of the labour force, are reasonable measures of trends within broad industry and occupational groups. The SEPH estimates are more

## **Erreurs de couverture**

Deux erreurs de couverture découlent des doubles comptes et le sous-dénombrement de la base de sondages. Les doubles comptes se produisent dans la base lorsqu'il est impossible de coupler les enregistrements des retenues sur la paye avec les entreprises correspondantes de la base de sondage. Le sous-dénombrement résulte du temps requis pour classer et (ou) coupler les nouvelles unités de retenues sur la paye avec les entreprises correspondantes.

La section des méthodes et du contrôle de la qualité de la division du Registre des entreprises produit des mesures de qualité pour assurer la bonne représentation de la liste des entreprises.

## **Contrôle et correction des données**

Au départ, les intervieweurs des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut être appelé à confirmer ou à expliquer ses chiffres.

Nos procédés de contrôle nous permettent de comparer les valeurs des principales caractéristiques (nombre de salariés, heures travaillées, traitement par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation est constatée ou que les données semblent incohérentes, l'ordinateur signale le cas, et les données de l'enregistrement sont corrigées ou leur exactitude est confirmée, selon le cas.

## **Comparabilité avec d'autres sources de données**

### **L'emploi**

Les données sur l'emploi de l'EERH sont souvent comparées aux estimations de l'emploi fournies par l'enquête sur la population active (EPA). Lorsque l'on compare les données de l'EPA qui sont fondées sur les ménages et les estimations de l'emploi de l'EERH qui sont basées sur les établissements, certaines différences peuvent être quantifiées et d'autres, non. Les rajustements quantifiables, dont peuvent faire l'objet les estimations de l'EPA, comprennent l'ajout des personnes cumulant des emplois et la suppression des travailleurs familiaux non rémunérés, des travailleurs autonomes, des absents non rémunérés (les travailleurs en grève par exemple), des entreprises constituées en société, des associés actifs dans des entreprises sans salariés et des activités économiques non visées par l'EERH. Les rajustements qui ne sont pas facilement quantifiables comprennent le codage selon la CTI, les différences au niveau des périodes de référence, des procédures d'enquête et les données économiques non déclarées. De plus, les données sur les Territoires du Nord-Ouest sont recueillies par l'EERH, mais non par l'EPA. Les données de l'EPA, qui sont axées sur les caractéristiques

suitable as indicators of employment change over detailed industry groups.

According to the 1980 SIC System, public administration (811-837) contains only those establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. SEPH does not publish defence services (811) and includes civilian defence workers in federal administration. Thus, SEPH publishes public administration data that essentially conforms to this definition. Government establishments engaged in activities such as health and education services and transportation and communication services are classified to the appropriate industries. The Public Institutions Division (PID) publishes government employment data that represent all employees of non-commercial entities under the control of a government.

The quantifiable adjustments to the PID data include the addition of Statistics Canada interviewers and the exclusion of military personnel, government personnel working outside of Canada, employees on unpaid absences and government employees assigned to industries other than public administration. The adjustments which are not easily quantifiable include differences in reference periods, survey procedures and the treatment of extra pay periods. The Labour and Public Institution Divisions conduct a reconciliation process to ensure that the public administration data are compatible.

### **Earnings**

The user community generally focuses on two earnings indicators which are often compared to the average weekly and hourly earnings data produced by SEPH. These two earnings indicators are referred to as the Labour Canada base wage rate settlements and the estimates of Wages and Salaries and Supplementary Labour Income produced by the Labour Division in Statistics Canada.

Labour Canada's wage rate indicator data include only unionized workers covered by major collective agreements representing 500 or more employees. For instance, the Labour Canada Base wage rate, as an indicator of wage change, covers about 10% of the overall SEPH employment. Therefore, the value and relevance of the Labour Canada base wage rate as an indicator of wage change should be carefully considered. The estimates of wages and salaries produced by the Labour Income Section are primarily based on annual T-4 supplementary administrative records provided by Revenue Canada Taxation which are projected forward on a monthly/quarterly basis

démographiques de la population active, sont des mesures raisonnables des tendances au niveau des grands groupes d'activités économiques et de professions. Les estimations de l'EERH constituent de meilleurs indicateurs des changements en matière d'emploi pour les groupes détaillés d'activités économiques.

Selon la CTI 1980 l'administration publique (811-837) comprend les établissements dont les activités ont un caractère essentiellement gouvernemental et les organismes auxiliaires assurant les services internes de l'État. Les services de la défense (811) sont exclus de l'EERH sauf les employés civils oeuvrant dans ce ministère. L'EERH publie des données pour l'administration publique par rapport à cette définition. Les établissements à caractère gouvernemental oeuvrant dans le domaine de la santé, l'éducation et le service des transports et de la communication sont classifiés par rapport à leur activité respective. La Division des institutions publiques (DIP), publie des données sur l'emploi pour les entités non-commerciales gérées par le gouvernement.

Les ajustements quantifiables aux données de DIP comprennent les intervieweurs de Statistique Canada mais excluent le personnel militaire, les personnes travaillant, à l'extérieur du Canada, en congé non payé et les personnes dont l'activité est autre que l'administration publique. Les ajustements qui ne sont pas obtenus facilement, comprennent des différences dans la période de référence, les procédures et le traitement des périodes de paye supplémentaire. La Division du travail et la Division des institutions publiques font une réconciliation afin de s'assurer que les données soient compatibles.

### **Gains**

Les utilisateurs optent généralement pour deux indicateurs de rémunération qui sont souvent comparé à la rémunération hebdomadaire et horaire produite par l'EERH. Ces deux indicateurs de rémunération représentent le taux salarial établi de Travail Canada et les estimations des salaires et traitements et du revenu supplémentaire du travail produites par la division du travail de Statistique Canada.

Les données sur le taux salarial de base de Travail Canada ne portent que sur les travailleurs syndiqués visés par des conventions collectives importantes représentant 500 employés ou plus. Plus précisément, le taux de base de Travail Canada, qui sert d'indicateur de l'évolution des traitements, porte sur environ 10% de l'ensemble des données sur l'emploi de l'EERH. Par conséquent, il convient de déterminer avec soin dans quelle mesure le taux salarial de base de Travail Canada s'avère valable et pertinent comme indicateur de la variation des traitements. Les estimations des traitements et salaires produites par la Section du revenu du travail sont fondées en grande partie sur les données des fichiers administratifs renfermant les feuillets annuels T-4

using SEPH and LFS data. Supplementary Labour Income (SLI), which accounts for about 11% of total Labour Income, are not measured by SEPH. SLI includes employer contributions to pensions plans, medical and other welfare plans, Canadian and Quebec Pension Plan and workers' compensation. The labour income estimates, which are a more comprehensive source of employment compensation, do not provide any information on wage rates. The SEPH data for average weekly/hourly earnings as well as Labour Canada's base wage rate statistics are imperfect indicators of wage rate changes because they are subject to compositional shifts by industries, by provinces and changes in underlying rates of pay.

### **Comparability Over Time**

SEPH data have been historically corrected to produce consistent time series from January 1983 to date. The revised time series, which incorporated corrections for major discontinuities, reflect economic change over the 1983-1991 period. By reducing the statistical impacts of sampling and non-sampling errors, the SEPH historically-corrected series can be considered to be more consistent trend measures of payroll employment, earnings and paid hours.

### **Products**

#### **Seasonal Adjustment**

It is common practice to publish most economic indicators in seasonally adjusted and unadjusted forms. Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as usual changes in weather, reduced or expanded production and the opening and closing of schools. Since these seasonal events follow a more or less regular pattern each year, their influence on statistical trends can be eliminated by adjusting the statistics from month-to-month. Seasonal adjustment is imperfect, so if a time series has irregular variation that is larger than the seasonal variation, the seasonally adjusted series will be a poor estimate. In the opinion of the Time Series Division of Statistics Canada, the unadjusted series will probably be a better estimate than the poorer seasonally adjusted series.

Supplémentaire fournies par Revenu Canada (Impôt); elles font l'objet de projections mensuelles/trimestrielles à l'aide des données de l'EERH et de l'EPA. L'EERH ne mesure pas le revenu supplémentaire du travail (RST), qui représente environ 11% du revenu du travail total. Le RST comprend les cotisations patronales aux régimes de retraite, aux régimes d'assurance-maladie et à d'autres régimes de prévoyance, au Régime de pensions du Canada, au Régime de rentes du Québec et à la caisse d'indemnisation des accidents du travail. Les estimations du revenu du travail, qui brossent un tableau plus complet de la rémunération du travail, ne fournissent pas de renseignements sur les taux de traitement. Les données de l'EERH sur les gains hebdomadaires/horaires moyens et les données sur le taux salarial de base de Travail Canada sont des indicateurs imparfaits de l'évolution des taux de traitement du fait qu'elles sont touchées par des variations dans la répartition des unités selon l'activité économique et la province, et par des changements dans les taux de rémunération sous-jacents.

### **Comparabilité dans le temps**

Les données de l'EERH ont été corrigées à partir de janvier 1983 de façon à assurer la cohérence des séries chronologiques à date. Les séries chronologiques révisées, qui comportaient des ruptures importantes, donnent maintenant un meilleur aperçu de l'évolution économique pour 1983-1991. Maintenant que l'incidence statistique des erreurs d'échantillonnage et des erreurs non dues à l'échantillonnage a été réduite, les séries chronologiquement révisées de l'EERH constituent des mesures plus cohérentes des tendances relatives à l'emploi, à la rémunération et aux heures de travail.

### **Produits**

#### **Désaisonnalisation**

Il est de pratique courante de publier la plupart des indicateurs économiques sous forme désaisonnalisée et non désaisonnalisée. Les fluctuations relevées dans les séries chronologiques d'ordre économique sont causées par des mouvements saisonniers, cycliques et irréguliers. Dans une série désaisonnalisée, les mouvements saisonniers ont été supprimés. Les mouvements saisonniers sont définis comme étant ceux qui sont causés par des événements qui se produisent chaque année, par exemple les changements climatiques habituels, le ralentissement ou l'accroissement de la production, et l'ouverture et la fermeture des établissements d'enseignement. Comme ces événements saisonniers se produisent à des intervalles annuels assez réguliers, leur incidence sur les tendances statistiques peut être supprimée en rectifiant les statistiques d'un mois à l'autre. La désaisonnalisation n'est pas parfaite; alors si une série chronologique présente des variations irrégulières plus importantes que les variations saisonnières, cette série désaisonnalisée sera une pauvre estimation. D'après la Division des séries chronologiques de Statistique Canada, il est alors préférable d'utiliser une série non désaisonnalisée.

### **Fixed-Weighted Earnings Index**

A set of fixed-weighted average hourly and weekly earnings index data has been constructed to deal with the impact of changes in the employment mix between industries, provinces/territories and salaried and hourly employees. This index provides a better indicator of the underlying trends in wage rates than the variable weighted earnings series.

This data series corrects the compositional changes of employment by re-aggregating SEPH survey information using fixed rather than variable weights for the paid hours. Overtime is excluded because it is an important source of compositional change in some industries. Statistics Canada's time base year for any index, such as the CPI, is 1986=100. Thus, for consistency purposes, the time base year for the fixed-weighted earnings index is the same.

### **Diffusion Index**

The diffusion index measures the dispersion of change for the SEPH variables and represents the fraction of industries which had year-over-year increases in the value of a variable. The SEPH diffusion index data are available for selected industry groups for Canada employment, average weekly hours, average hourly earnings and average weekly earnings adjusted for inflation.

The diffusion index can be used to assess how broad based a change in level is for SEPH variables such as employment or average weekly hours for the Industrial Aggregate. The index is particularly useful in analyzing trends in cyclically-sensitive industries such as manufacturing and trade.

### **Revision Policy**

On a monthly basis, the preliminary data will be revised in the following month. On an annual basis, seasonally-adjusted and raw data will be revised with the release of the December revised data for the calendar year. The SEPH Program will keep up to 4 years open for revision to coincide with the revisions made every June by the Canadian System of National Accounts Divisions in Statistics Canada.

From time to time, an historical revision is necessary for changes related to new data sources and revised industry classifications and frame changes.

### **Products and Services**

This publication contains a selection of data available from the Survey of Employment, Payrolls and Hours.

### **Indice des gains à pondération fixe**

La série à pondération fixe des gains horaires et hebdomadaires moyens a été conçue pour traiter l'impact des changements dans l'emploi entre; les industries, provinces/territoires, les employés et les employés payés à l'heure. Cet indices est un meilleur indicateur des tendances des gains à celles des gains pondérés.

Il s'agit d'une série de données qui corrige les changements dans la composition de l'emploi en groupant différemment les données de l'EERH au moyen d'une pondération fixe plutôt que variable pour les heures payés. Le temps supplémentaire est exclu parce que cet élément influe de façon considérable sur la composition de l'emploi pour certaines activités économiques. L'année de référence déterminée par Statistique Canada pour tout indice, par exemple l'IPC, est 1986=100. Par conséquent, c'est aussi celle qui a été établie pour l'indice des gains à pondération fixe, pour assurer la cohérence.

### **Indice de diffusion**

L'indice de diffusion indique l'ampleur des changements intervenues au niveau des variables de l'EERH et représente la fraction des industries pour lesquelles on a enregistré une croissance annuelle de la valeur de cette variable. Les indices de diffusion rendus disponibles par l'EERH sont l'emploi au Canada, les heures hebdomadaires moyennes travaillées, la rémunération horaire et hebdomadaire moyenne après correction pour l'inflation.

Les indices de diffusion permettent de repérer la tendance générale adoptée par les variables de l'enquête tel que l'emploi ou les heures hebdomadaires moyennes pour l'ensemble des industries. L'indice est particulièrement apprécié dans l'analyse des tendances au niveau des industries plus sensibles au mouvements cycliques tel que les industries manufacturières et le commerce.

### **Politique de révision**

Sur une base mensuelle, les données préliminaires seront révisées le mois suivant. Par contre, la révision des données désaisonnalisées et non-désaisonnalisées se fera sur une base annuelle, c'est-à-dire avec la parution des données révisées du mois de décembre de l'année en cours. Afin de coïncider avec les révisions de juin de les divisions du Système canadien de comptabilité nationale de Statistique Canada, l'EERH se réserve une période ouverte de quatre ans.

A l'occasion, une révision historique devient nécessaire. Cela est dû aux nouvelles sources de données, une classification d'industries révisées et au changement à la base de sondage.

### **Produits et services**

La présente publication contient une sélection de données disponibles de l'enquête sur l'emploi, la rémunération et les heures de travail.

A labour market consultant will be pleased to help you design your own table for your additional data requirements. Please call (613) 951-4090 or fax your request to (613) 951-4087.

Before the introduction of SEPH in 1983, three main sources were used to collect employment, earnings and hours data: the Employment, Payrolls and Manhours Survey(ES-1) (survey of large firms in commercial industries), the Employment Sample Survey (ES-2)(survey of small firms in commercial industries), and other employment surveys covering institutions and organizations in the non-commercial sector (GAP)(survey of education, health and welfare, and religious organizations). For more information on linking SEPH data with the ES-1 and ES-2, please contact our labour market consultants.

The data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). For further information on CANSIM call (613) 951-8200 or your nearest regional office.

#### **References**

##### ***Confidentiality***

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected. An industry for a geography is deemed confidential if the number of respondents is small, or if only a few of the respondents are reporting a very large majority of the employment, while the majority of the respondents are reporting only a few employees each.

For detailed information on the methodology of SEPH, documents are available from the SEPH Dissemination Unit.

Un conseiller en marché du travail se fera un plaisir de vous aider à créer votre propre tableau pour répondre à vos besoins additionnels en données. Veuillez téléphoner au (613) 951-4090 ou envoyer votre demande par télécopieur au (613) 951-4087.

Avant la réalisation de l'EERH en 1983, les données sur l'emploi, la rémunération et les heures de travail provenaient de trois grandes sources : l'enquête sur l'emploi, la rémunération et les heures-hommes (ES-1) (enquête auprès des grandes entreprises des branches d'activité commerciale), l'enquête-échantillon sur l'emploi (ES-2) (enquête auprès des petites entreprises des branches d'activité commerciale), et d'autres enquêtes sur l'emploi portant sur les établissements institutionnels et les organismes du secteur non commercial (GAP)(enquêtes menées auprès d'organismes religieux et dans les domaines de l'éducation, de la santé et du bien-être). Pour plus de renseignements sur le couplage des données de l'EERH et de celles de ES-1 et de ES-2, veuillez communiquer avec nos conseillers en marché du travail.

Les données qui paraissent dans la présente publication sont aussi disponibles sous forme ordinolingué dans CANSIM (Système canadien d'information socio-économique). Pour de plus amples renseignements sur CANSIM, veuillez téléphoner au (613) 951-8200 ou au bureau régional le plus près.

#### **Référence**

##### ***Confidentialité***

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises. Une industrie, pour une géographie est considérée confidentielle si la quantité de répondants est petite ou si seulement quelques répondants représentent la majorité de l'emploi alors que la plus grande partie des répondants représentent seulement quelques employés chacun.

Des documents contenant des renseignements plus détaillés sur la méthodologie de l'EERH peuvent être obtenus en communiquant avec l'Unité de diffusion.

Les concepts et méthodes sont décrits à la fin de la présente publication.  
Les données pour le mois courant sont préliminaires.

# HIRE OUR TEAM OF RESEARCHERS FOR \$53 A YEAR

# NOTRE ÉQUIPE DE CHERCHEURS EST À VOTRE SERVICE POUR 53\$ PAR ANNÉE

Subscribing to **Perspectives on Labour and Income** is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But **Perspectives** is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analysing the statistics to bring you simple, clear summaries of where the labour market and income distributions are headed.

Our team of experts is working to bring you the latest labour and income data. Each quarterly issue has:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research projects
- information on new survey results

As a special bonus, twice a year you will also receive a Labour Market Review, giving you up-to-the-minute analysis and data of how the labour market has performed over the last six months or year.

**And all for only \$53.00.**

Thousands of Canadian professionals turn to **Perspectives** to discover new trends in labour and income and to stay up-to-date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find **Perspectives** indispensable. **GUARANTEED.** If you aren't convinced after reading your first issue, we'll give you a **FULL REFUND** on all outstanding issues. Order your subscription to **Perspectives** today.

S'abonner à **L'emploi et le revenu en perspective**, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les tendances actuelles du marché du travail et de la répartition des revenus.

Notre équipe de spécialistes travaille activement afin de mettre à votre disposition des données actuelles sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez

- des articles de fond rédigés par des spécialistes de l'emploi et du revenu;
- plus de 50 indicateurs clés de l'emploi et du revenu;
- un aperçu des projets de recherche en cours;
- de l'information provenant des nouvelles enquêtes.

En plus, vous recevrez une revue du marché du travail, un supplément publié deux fois par année.

**Tout cela pour 53 \$ seulement!**

Des milliers de professionnels au Canada consultent **Perspective** pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que **L'emploi et le revenu en perspective** deviendra pour vous un outil indispensable. Nous le garantissons. Si vous n'êtes pas satisfaits après avoir lu le premier numéro, nous vous **REMBOURSERONS** le montant payé pour les numéros à venir. Abonnez-vous à **Perspective** dès aujourd'hui.

# Find out the inside story on 20% of the labour force

**U**ncovering the latest labour changes in the public sector can be tough. But now there's a publication to help.

**Public Sector Employment and Remuneration 1991/92, (With Historical Data from 1987)** gives you reliable data, consistent comparisons, and concise analysis on the changing levels of public sector employment.

This publication brings you all the facts! **Public Sector Employment and Remuneration 1991/92** provides you with the most up-to-date public sector employment statistics, including **for the first time, FULL COVERAGE OF THE PUBLIC SECTOR** and new **CENSUS METROPOLITAN AREA DATA** for federal and local governments.

This valuable working tool will help you to:

- Chart changes in public sector employment: nationally, provincially and locally.
- Make direct comparisons between employment levels: federal, provincial, inter-provincial, and municipal.

**Don't miss this opportunity** to get the information you need to understand where we are and make informed decisions about public sector employment strategies for the '90s.

---

**Order your copy of *Public Sector Employment and Remuneration* today!**

Each copy of **Public Sector Employment and Remuneration** (Catalogue no. 72-209) costs only \$39 in Canada (plus GST), US\$47 in the United States and US\$55 in other countries.

For faster ordering, call toll-free **1-800-267-6677** and use your VISA or MasterCard. Or **fax** your order to **(613) 951-1584**.

# Découvrez les faits réels qui touchent 20 % de la population active

**I**l est parfois difficile de se tenir informé des derniers développements survenus dans le dossier de l'emploi. Heureusement, il existe maintenant une nouvelle publication pour combler cette lacune.

**Emploi et rémunération dans le secteur public en 1991-1992, (Avec les données historiques de 1987)** fournit des données fiables, des comparaisons pertinentes et des analyses concises sur l'évolution du niveau d'emploi dans le secteur public.

Cette publication est une source de données factuelles. **Emploi et rémunération dans le secteur public en 1991-1992** vous offre les statistiques les plus récentes sur l'emploi dans le secteur public et, **pour la première fois, UNE COUVERTURE COMPLÈTE DU SECTEUR PUBLIC** et les nouvelles **DONNÉES SUR LES RÉGIONS MÉTROPOLITAINES DE RECENSEMENT** pour les administrations fédérale et locales.

Cet ouvrage de référence inestimable vous aidera à :

- représenter graphiquement l'emploi total dans le secteur public, à l'échelle nationale, provinciale et locale;
- établir des comparaisons directes entre les niveaux d'emploi dans les administrations fédérale, provinciales, interprovinciales et municipales.

**Ne ratez pas l'occasion** d'en savoir davantage sur la situation actuelle de l'emploi afin de pouvoir prendre des décisions éclairées sur les stratégies d'emploi à adopter pour le secteur public dans les années 1990.

---

**Commandez dès aujourd'hui votre exemplaire d'Emploi et rémunération dans le secteur public.**

**Emploi et rémunération dans le secteur public en 1991-1992** (n° 72-209 au Catalogue) est vendu seulement 39 \$ l'exemplaire au Canada (TPS en sus), 47 \$ US aux États-Unis et 55 \$ US dans les autres pays.

Pour commander, écrivez à : **Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6** ou communiquez avec le bureau régional de Statistique Canada le plus proche (la liste figure dans la présente publication).

Pour un service plus rapide, composez sans frais le **1-800-267-6677** et faites débiter votre carte VISA ou MasterCard. Il est aussi possible de passer votre commande par télécopieur au **(613) 951-1584**.

# To those of you who need in-depth information about the labour market...

...Statistics Canada produces *Labour Force Annual Averages 1991* - a reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force*.

The *Labour Force Annual Averages 1991* covers:

- an overview of changes that occurred in the service industries over the period 1976 to 1991;
- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- industries for CMAs and economic regions;
- labour market participation and family responsibilities by provinces;
- and more.

*Labour Force Annual Averages 1991*. Part and parcel of Statistics Canada's customer-driven approach to business information.

*Labour Force Annual Averages 1991* (catalogue number 71-220) is available for \$39 in Canada, US\$47 in the United States and US\$55 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list of centres appears in this publication.)

For faster service, FAX your order to 1-613-951-1584.

Or call toll-free 1-800-267-6677

and use your VISA or MasterCard.

# À ceux d'entre vous qui désirent obtenir de l'information plus détaillée sur le marché du travail...

...Statistique Canada présente *Moyennes annuelles de la population active 1991* - un document de référence créé spécialement à votre intention. Vous y trouverez des données détaillées, des sommaires et des graphiques faciles à consulter, des ventilations géographiques plus détaillées qu'auparavant et davantage de variables et de recoupements qu'il n'en paraît dans les numéros mensuels de *La population active*.

*Moyennes annuelles de la population active 1991* porte sur:

- un aperçu des changements qui sont survenus dans le secteur des services au cours de la période 1976 à 1991;
- les heures perdues et l'absentéisme, ventilés par secteur d'activité et province;
- l'emploi à plein temps et à temps partiel, ventilé par secteur d'activité et province;
- les professions dans les régions métropolitaines et les régions économiques;
- les secteurs d'activité dans les régions métropolitaines et les régions économiques;
- la participation au marché du travail et les obligations familiales selon la province;
- et bien d'autres.

*Moyennes annuelles de la population active 1991* est un pivot de l'approche de Statistique Canada qui vise à satisfaire les besoins de ses clients en matière d'information.

*Moyennes annuelles de la population active 1991* (numéro 71-220 au catalogue) : est offert à 39 \$ au Canada, 47 \$ US aux États-Unis et 55 \$ US dans les autres pays.

Pour commander, prière d'écrire à l'adresse suivante : Vente des publications, Statistique Canada, Ottawa (Ontario) K1A 0T6, ou communiquer avec le centre régional de consultation de Statistique Canada le plus proche (liste des centres incluse dans la présente publication).

Pour accélérer le service, commander par télécopieur au 1-613-951-1584, ou composer sans frais le 1-800-267-6677 et utiliser la carte VISA ou MasterCard.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Employment, Earnings and Hours,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-4090) or to the Statistics Canada reference centre in:

|            |            |           |            |

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressés à:

Emploi, gains et durée du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-4090) ou au centre de consultation de Statistique Canada à:

|            |            |           |            |

## Note of Appreciation

*Canada owes the success of its statistical system to  
a long-standing cooperation involving Statistics  
Canada, the citizens of Canada, its businesses and  
governments. Accurate and timely statistical  
information could not be produced without their  
continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose  
sur un partenariat bien établi entre Statistique Canada  
et la population, les entreprises et les administrations  
canadiennes. Sans cette collaboration et cette bonne  
volonté, il serait impossible de produire des statistiques  
précises et actuelles.*

---

## Notes

Data for the current month are preliminary estimates and are subject to revision in the next issue of this publication.

Data contained in this publication (unless otherwise specified) are not seasonally adjusted.

---

### Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

---

### Note on CANSIM

The data published in Employment, Earnings and Hours (Catalogue No. 72-002) are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). Users interested in accessing data via CANSIM should contact one of Statistics Canada's regional centres at the numbers listed on the inside front cover of this publication, or contact CANSIM division, Statistics Canada, R.H. Coats Building, Ottawa, Ontario, K1A 0T6 (613) 951-8200

---

### Design your own table

Design your own table to order Employment, Payrolls and Hours data in the detail you need it. All data collected by the survey can be custom tabulated to meet your particular data needs. A consultant will help you custom design your tabulation. Our office is open from 8:00 A.M. to 4:30 P.M..

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48-1984. ♾

# Survey Overview

# Aperçu de l'enquête

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of payroll employment, paid hours and earnings. These measures are compiled at detailed industrial levels for Canada, the Provinces and Territories.

All employers in Canada, except those primarily concerned with agriculture, fishing and trapping, private household services, religious organizations and defence services, form the target population for the survey.

Conceptually, the SEPH reference period is the last seven days in any specified month, but the questionnaire asks respondents to report for the last pay period in the month.

The statistics contained in this report are based on information provided by firms of all sizes and in the case of government units, by Public Institutions Division in Statistics Canada.

Data are released for the two latest reference months. The preliminary month's estimates and the preceding revised month's estimates are based on response rates of approximately 80% and 90% respectively.

## DEFINITIONS

### *Employee:*

Any person(s) drawing pay for services rendered or for paid absences, and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form.

### *Average Earnings:*

Gross taxable payrolls divided by the number of employees on payrolls equals average earnings. Excluded from the payroll dollar amounts are taxable allowances and benefits, lump sum special payments, certain types of non-wage compensation as well as employer contributions to unemployment insurance, Canada/Quebec pension plans, provincial medical plans, worker's compensation and other welfare plans.

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances mensuelles de l'ensemble des salariés inscrits sur le registre de paye, des heures rémunérées et des gains. Ces mesures sont rassemblées à des niveaux détaillés selon l'activité économique pour le Canada les provinces et les territoires.

L'enquête vise tous les employeurs au Canada à l'exception de ceux dont l'activité principale est liée à l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

En théorie, la période de référence de l'EERH correspond aux sept derniers jours du mois de référence, mais les répondants doivent remplir le questionnaire en tenant compte de la dernière période de paye du mois.

Les statistiques contenues dans ce rapport sont basées sur des renseignements fournis par des entreprises de toutes tailles ainsi que par la Division des institutions publiques de Statistique Canada.

Les statistiques sont publiées sur les deux derniers mois de référence. Les estimations préliminaires du mois le plus récent et les estimations révisées du mois précédent sont basées sur des taux de réponse approximatifs de 80 % à 90 % respectivement.

## DÉFINITIONS

### *Salarié:*

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada.

### *Gains moyens:*

La masse salariale brute imposable divisée par le nombre de salariés inscrits sur la liste de paye est égale aux gains moyens. Sont exclus de la masse salariale, les indemnités imposables, les paiements forfaitaires spéciaux, certains genres de rémunération non salariale ainsi que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes de pension du Canada et du Québec, aux régimes d'assurance-maladie provinciaux, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance.

**Average Hours:**

Average weekly hours are obtained by dividing the total weekly hours by the number of employees. Total paid hours are defined as all hours worked including overtime hours plus hours of paid absence.

**Heures moyennes:**

Les heures hebdomadaires moyennes sont calculées en divisant le nombre total d'heures hebdomadaires par le nombre de salariés. Le nombre total d'heures rémunérées est défini comme étant toutes les heures travaillées y compris les heures supplémentaires et les heures d'absence payées.

*There are differences between SEPH and other related employment and compensation measures. A summary of these differences and a more detailed description of the SEPH survey is located in the Concepts and Methods Section (Annex 1).*

*Certaines mesures de l'emploi et de la rémunération, souvent comparées aux données de l'EERH, présentent des différences entre elles. Un résumé de ces différences et une description plus détaillée de l'enquête sur l'EERH figurent dans la section sur les Concepts et les méthodes (annexe 1).*

## Highlights

## Faits saillants

### Preliminary Estimates of November 1992, Seasonally adjusted

• The preliminary estimate of payroll employment for November indicates a slight increase to 9,910,000 after five months of decline. Most industries showed some employment growth, led by retail trade, wholesale trade and durable goods manufacturing. Retail trade recorded the strongest month-to-month increase since May 1991.

• After declining for the first four months of 1992, business services have generally shown an improving trend since May. Seasonally adjusted employment in business services for November was 0.6% higher than the previous month, and virtually unchanged from the November 1991 level.

• Seasonally adjusted average weekly earnings<sup>1</sup> were \$556.51 in November, a gain of 3.4% compared to November 1991. The year-over-year growth in earnings continued to be lower than in previous years.

### Estimations préliminaires du mois de novembre 1992, Données désaisonnalisées

• D'après les estimations préliminaires, le nombre de salariés inscrits sur la liste de paye a quelque peu augmenté en novembre après cinq mois de recul pour atteindre 9,910,000 salariés. Une croissance de l'emploi a été observée dans la plupart des industries, en particulier dans le commerce de détail, le commerce de gros et des biens durables des industries manufacturières. Le commerce de détail a inscrit la plus forte augmentation d'un mois à l'autre depuis mai 1991.

• Les services aux entreprises, qui avaient régressé durant les cinq premiers mois de l'année, ont été généralement en hausse depuis mai. Après désaisonnalisation, l'emploi dans les services aux entreprises en novembre dépassait de 0.6 % celui du mois précédent et se situait presque au même niveau qu'en novembre 1991.

• La rémunération hebdomadaire moyenne désaisonnalisée<sup>1</sup> s'établissait à \$556.51 en novembre, une hausse de 3.4 % par rapport à novembre 1991. La croissance des gains d'une année à l'autre reste inférieure à ce qu'elle était les années précédentes.

November 1992 / Novembre 1992

#### SEPH Average Weekly Earnings, Seasonally Adjusted / Rémunération hebdomadaire moyenne, désaisonnalisée.

November 1992 / Novembre 1992

• Compared to the previous month, the industrial aggregate<sup>2</sup> average weekly earnings rose by 0.3%. Forestry (1.8%), finance insurance and real estate (0.9%), trade (0.5%), accommodation, food and beverage services (0.5%) and

• Par rapport au mois précédent, la rémunération hebdomadaire moyenne pour l'ensemble des industries<sup>2</sup> a augmenté de 0.3 %. La croissance des gains dans l'exploitation forestière (1.8 %), les finances, les assurances

health and social services (0.4%) recorded earnings growth higher than the industrial aggregate.

- From April to November 1992, average weekly hours for hourly paid employees have remained flat at 30.5 hours. Average hourly earnings of hourly paid employees stood at \$13.97 in November, an increase of \$0.35 since the beginning of 1992. The monthly growth in average weekly earnings was the result of an increase in average hourly earnings while average weekly hours were unchanged.

#### Unadjusted Data

- Employment in durable goods manufacturing was down 1.5% from November 1991, the smallest year-over-year drop since the industry began its downturn in January 1990. Nearly half of durable goods industries exhibited increases in November, with the diffusion index reaching 0.49.

- Firms with 200 or more employees and firms with less than 200 employees both recorded identical year-over-year growth rates for employment of -1.6%. The increasing trend in employment has levelled off for firms with less than 200 employees.

- The fixed-weighted average hourly earnings index was 130.7, an increase of 3.4% from November 1991. The index has continued to show lower increases than in previous years.

---

<sup>1</sup>The industrial aggregate is the sum of all industries with the exception of agriculture, fishing and trapping, religious organizations, private households and military personnel.

<sup>2</sup>Not adjusted for inflation.

et les affaires immobilières (0.9 %), le commerce (0.5 %), l'hébergement et la restauration (0.5 %) et les services de santé et les services sociaux (0.4 %) a dépassé celle observée pour l'ensemble des industries.

- Entre avril et novembre 1992, les heures hebdomadaires moyennes des salariés rémunérés à l'heure sont restées inchangées, soit 30.5. La rémunération horaire moyenne des salariés rémunérés à l'heure s'établissait à \$13.97 en novembre, une augmentation de \$0.35 depuis le début de l'année. La croissance mensuelle de la rémunération hebdomadaire moyenne est le résultat d'un accroissement des rémunérations horaires moyennes, le nombre moyen d'heures hebdomadaires étant le même.

#### Données non désaisonnalisées

- L'emploi des biens durables des industries manufacturières est en baisse de 1.5 % par rapport à novembre 1991, soit le plus faible recul d'une année à l'autre depuis que ce secteur a amorcé sa phase descendante en janvier 1990. Près de la moitié des industries des biens durables des industries manufacturières ont inscrit des hausses en novembre, l'indice de diffusion ayant atteint 0.49.

- Les entreprises de 200 salariés ou plus et celles de moins de 200 salariés ont connu le même taux de croissance négatif de l'emploi d'une année à l'autre de -1.6 %. La tendance à la hausse de l'emploi dans les entreprises de moins de 200 salariés a plafonné.

- L'indice à pondération fixe de la rémunération horaire moyenne s'est établi à 130.7, une augmentation de 3.4 % par rapport à novembre 1991. Cet indice continue à démontrer des augmentations inférieures à celles des années précédentes.<sup>2</sup>

---

The seasonally adjusted Canada preliminary employment estimate for November 1992 was at 9,910,010, down 183,588 from November 1991.

Les estimations préliminaires désaisonnalisées de l'emploi au Canada étaient de 9,910,010 en novembre 1992, une baisse de 183,588 par rapport à novembre 1991.

In November 1992, all industries except Logging & Forestry and Public Administration were at their lowest November employment levels in the last four years.

En novembre 1992, toutes les industries ont enregistré leur plus faible mois de novembre au niveau de l'emploi depuis les quatre dernières années à l'exception de l'exploitation forestière et services forestiers et de l'administration publique.

Les concepts et méthodes sont décrits à la fin de la présente publication.  
Les données pour le mois courant sont préliminaires.

## Table 2

## Tableau 2

**Estimates of Average Weekly Earnings, for All Employees, Seasonally Adjusted and Unadjusted, Firms of All Sizes, for Selected Industries, Canada, Provinces and Territories, (1988-1992).**

**Estimations désaisonnalisées et non désaisonnalisées de la rémunération hebdomadaire moyenne, pour l'ensemble des salariés, entreprises de toutes les tailles, pour une sélection d'industries, Canada, provinces et territoires, (1988-1992).**

In November 1992, the seasonally adjusted estimate of average weekly earnings for Canada was \$556.51, a 3.4% increase over November 1991. All industries recorded increases during this period, ranging from 1.0% for Construction to 8.0% for Finance, Insurance & Real Estate.

La rémunération hebdomadaire moyenne désaisonnée s'établissait à \$556.51 en novembre 1992, une hausse de 3.4% par rapport à novembre 1991. Durant la même période, toutes les industries ont enregistré des augmentations passant de 1.0% pour la construction à 8.0% pour les finances, assurances et affaires immobilières.

Les concepts et méthodes sont décrits à la fin de la présente publication.  
Les données pour le mois courant sont préliminaires.

## Table 3

**Fixed-weighted Indexes of Average Hourly Earnings, for All Employees, Firms of All Sizes, for Selected Industries, Canada, Provinces and Territories, (1986 = 100), (1988-1992).**

Yearly increases for the fixed-weighted average hourly earnings index for all employees ranged from 1.7% in Logging and Forestry to 6.9% in Finance, Insurance and Real Estate. November's index for the industrial aggregate has increased by 3.2% over the one year period.

## Tableau 3

**Indices à pondération fixe de la rémunération horaire moyenne, pour l'ensemble des salariés, entreprises de toutes les tailles, pour une sélection d'industries, Canada, provinces et territoires, (1986 = 100), (1988-1992).**

L'augmentation annuelle de l'indice à pondération fixe de la rémunération horaire moyenne de l'ensemble des salariés passe de 1.7% pour l'exploitation forestière et services forestiers à 6.9% pour les finances, assurances et affaires immobilières. L'indice du mois de novembre pour l'ensemble des industries a augmenté de 3.2% durant l'année.
